GLOWING REPORT

GlassFire is an elegant new solution to good-looking indoor fireplaces. Designed to be primarily decorative, GlassFire provides supplementary heating and uses an environmentally friendly plant-derivative fuel. With a choice of cut-glass, stone, aluminium or wenge wood bases, GlassFire can be easily moved from room to room. For more information phone Lynn Lombart on (011) 486 0547.

COME IN FROM THE COLD

Check out Earthfire's range of ceramic fireplaces this winter, providing an efficient alternative to metal fireplaces. Earthfire's clay structure has the ability to heat a room long after the fire has burned down. The wood-burning fireplace combines continuous draw with complete combustion, so the only maintenance required is a brushing out of the fine ash after approximately 15 fires. For more info, phone (021) 715 3698 or visit www.earthfire.co.za.
